

BEA INTEGRATION ARCHITECT / DEVELOPER

Utility Integration Solutions, Inc. (www.UISOL.com) is a boutique systems integrator specializing in the utility industry. We help utilities improve their performance through systems integration and business process management. We are currently implementing some of the most complex business integration projects in the utility industry. We also provide thought leadership in the utility industry by serving on numerous industry forums such as IEEE, Distributech, and CRN, as well as integration standards groups such as IEC and MultiSpeak. We are the organizer of the annual Utility Integration Conference (UIC) that is currently in its 4th year (<https://www.euci.com/conferences/0907-UIC-2007/index.php>). The company is 100% employee owned, offers a competitive compensation package to attract the best and the brightest employees, and has an exceptionally high employee retention rate.

JOB DESCRIPTION

Work as an integration architect in a team setting to assist utilities in implementing service-oriented architectures based on the BEA Weblogic and Aqualogic product suites. Expertise with BEA Weblogic Application Servers, Weblogic Portal, Weblogic Integration (WLI), Aqualogic Service Bus, Aqualogic Registry, and Aqualogic Repository is essential. Familiarity with utilities and utility business processes is ideal, but optional. Responsibilities will include needs assessment, requirements development, integration design, integration implementations, quality assurance, and SOA governance.

JOB REQUIREMENTS

- Highest standards of professional ethics (minimum)
- Ten years of work experience (minimum)
- Five years working with middleware – BEA (minimum), Tibco, Vitria, WebMethods, and/or WebSphere (desired)
- Two years of consulting experience (desired)
- Integration architecture work experience (minimum)
- Experienced in Service-Oriented Architectures (SOA) (minimum)
- Experienced in Enterprise Applications Integration (EAI) (minimum)
- Experienced in Business Process Management (desired)
- Experienced in gathering business and functional requirements and translating into end-to-end technology solutions (minimum)
- Familiarity with utility industry integration standards such as CIM and MultiSpeak (desired)
- Experienced in team leadership (minimum)
- Excellent customer interaction skills (minimum)
- Team player (minimum)
- Good oral and written communication skills (minimum)
- Willing/able to travel to southern California – Los Angeles and San Diego - at 80% (minimum)
- Computer Science degree or equivalent (minimum)
- US citizens or permanent resident (minimum)

UISOL is committed to the principles of equal employment opportunity for all employees and applicants. Please submit your resume to AVojdani@UISOL.com.
