**UISOL**

*Utility Integration Solutions, Inc.*

A man in a dark suit is shown in profile, sitting in a chair and working on a laptop. The scene is set against a bright, golden-yellow background with a complex, geometric structure of dark lines, possibly a large-scale architectural or industrial framework. The lighting is dramatic, highlighting the man's silhouette and the laptop's screen. The overall mood is professional and forward-looking.

**Good. Better. Best. And beyond.**

# The quest for improved performance.

For many companies,  
the solution is found in  
total business integration.

Connecting disparate computer systems throughout their enterprises for front-to-back, top-to-bottom seamless operation.

From customer service to financial systems and transactions with customers and trading partners, this integrated approach translates into **reduced costs, better service and greater agility.**

And that's what **Utility Integration Solutions, Inc. (UISOL)**  
is all about.

## The process for improvement

As an IT consultancy, **UISOL** helps utilities reduce costs, minimize outages and increase customer satisfaction through business process improvement and systems integration. We specialize in the application of Business Process Management (BPM), Enterprise Applications Integration (EAI), and Business-to-Business (B2B) integration.

## At your service

**UISOL** specializes in the following services for *your* total business integration initiative:

- Management Consulting
- Business Process Modeling
- Requirements Specifications
- Needs Assessment
- Integration Technology Assessment
- Information Modeling
- Business Process Simulation
- Systems Architecture and Design
- Implementation Strategy
- Cost/Benefit Analysis
- Program Management
- Systems Integration Services
- Quality Assurance Testing
- Training

## There is no substitute for experience

**UISOL** is the only systems integration consultancy solely focused on the improvement of utility industry business processes. This, combined with extensive experience in the implementation of large-scale systems integration projects, and vast knowledge of business processes, computer applications and open standards of the utility industry, represents unparalleled value for clients.
